

# Software Training

Dayta Designs is fully accredited to sell, support and provide training on the new Sage 200, Line 100 and MMS. In addition we are an 'Access Dimensions Partner' and can provide training on this flagship product from Access Accounting.

Training your staff effectively is crucial in order to get the full potential from the software. Our trainers have many years using the products, so they teach not just from theory, but from experience as well.

## On Site Training

Teaching people at their own desk, is very effective as people are more relaxed and retain more information. The training is specific to the users tasks and incorporates internal procedures and paperflows.

## Classroom Style Training

Key people in a company can often benefit from the comparative calm of training at our offices – no interruptions.

Classroom training is also very effective if a number of staff need to learn about the same module with the software – such as the Report Writer.

## New Staff

If a new person joins a company, or the software is upgraded, we are always willing to give refresher courses. Training is not just given when we install new software.

## Some Clients we have Trained
